Adform Creative Toolkit

It is highly recommended to use Adform Creative Toolkit extension for Flash to deliver banners fully compliant with the specs. Download the latest version of Adform Creative Toolkit here: <http://test.adform.com/testpage/>

The Creative Toolkit auto-implements the required ActionScript commands on the flash files. Once exported, the assets are ready to be uploaded to the Adform system.

Alternatively, if you prefer to create the ads without the Creative Toolkit, follow the instructions on Adform Test and Support Center: <http://test.adform.com/testpage/banner-specifications/>

Once exported, the assets are ready to be uploaded to the Adform system.
